

EXTEND Softshell Jacket

Size: XS-S-M-L-XL-2XL-3XL-4XL-5XL-6XL
Shell fabric: 100% Polyester, 300 g/m²
Wash:

Practical and classic softshell jacket, which is wind and water-repellent using a more environmentally-friendly water-repellent treatment that does not contain fluoride. The softshell jacket is a good transitional jacket in early spring or autumn, when mornings and evenings can feel chilly. The wind and water-repellent feature helps keep you warm, for example to and from work or when working outdoors. The softshell jacket has a soft and windproof fleece inner collar making it comfortable to wear when fully closed, especially against the face and chin. The jacket also has a concealed zipper with Velcro at the front and multiple functional pockets. A drawstring at the bottom makes it easy to adjust and helps to keep the wind out. The jacket's design offers ample space for company profiling.

- Comfortable microfleece in collar for increased comfort
- Wind and water-repellent
- Multiple functional pockets
- Concealed zipper with Velcro at the front
- Simple design provides ample space for company profiling
- Adjustable hem with drawstring, for easy customisation
