HANDTRUCK FOR WELDING EQUIPMENT

Professional Laskar, capacity 150 kg.

- Ultra-stable handtruck for welding equipment.
- Welding machine, bottle and toolbox together on one handtruck. Everything at hand!
- Ideal for smaller companies with multiple welding equipment.
- The plate for the welding transformer is adjustable in height and width.
- The ingenious bracket protects the bottle against falling over and at the same time serves as cable and hose reel.
- Wide in depth adjustable plate (217 mm to 342mm).
- Fully executed in hammered gray powder coated steel.
- Oval tube with ergonomic safety handles made of natural rubber with knuckle protection.
- Made of oval tube for better pressure distribution and higher load.
- Equipped with solid rubber tires.
- Supplied with 2 straps.
- Developed for bottles (welding gas) with a diameter of 24cm.
