Structure

Grit	zirconia alumina
Coating	close
Bonding	resin over resin
Backing	vulcanized fibre
Production width	
Other	multibond
Delivery form	fibre disc (hole pattern: 10=round hole, 30=star shaped hole)

Application

Material	stainless steel, aluminium, non-ferrous metals
Application	removing of weldings, deburring, grinding of edges, but also surfaces
Machines	angle grinder

Market segment

rough to finish grinding of workpieces out of stainless steel and aluminium with angle grinders

Product utility

High-performance fibre disc with high stock removal rate and long service life due to the self-sharpening zirconium grain, especially for the processing of stainless steel and high-alloyed steel. Additional coating with grinding active fillers (multibond) for cool grinding, but also for reduced clogging while working on smearing materials like aluminium.
